### PRE-READING AND WRITING EXERCISES FOR PERSONS WITH MACULAR SCOTOMAS

**MARY WARREN PhD, OTR/L, SCLV, FAOTA**

Compilation of training exercises\* designed by Mary Warren to improve scanning performance in clients with macular scotomas resulting from hemianopsia and macular diseases. The exercises provide clients with practice in making the precise eye movements needed to compensate for loss of vision in the central visual field and increase speed and accuracy in reading and writing. They can be incorporated into clinical treatment or provided as home programs to supplement clinical activities and are appropriate for children and adults.

The packet includes 80 pages of reproducible worksheets containing letters, numbers and figures printed in four graduated font sizes to accommodate visual acuities up to 20/200. Complete instructions are included for using the exercises.

(\* many of these exercises have been shown in the continuing education workshops provided by Ms. Warren)
